Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Wang (2004/0159421).

Wang discloses a fin assembly for a heat sink including a plurality of metal plates (see Fig. 1), each of the metal plates including a body member (11) having a top and bottom folded edge, a plurality of connecting structures (12 in Fig. 2) protruding perpendicularly from the body member (11) and located at four diagonal corners of the body member (11), each of the body members (11) being perforated with a plurality of through holes (14), each of the connecting structure including a partitioning part (the portion of 12 extending at a 90 degree angle to plate 11), a latching part (13) extending from the partitioning part, the latching part being aligned with the corresponding through hole (14), and a connecting part between the partitioning part and the latching part (13), the latching part being inserted through the corresponding through hole of the metal plate placed in front (see Fig. 4B) and being bent as a hook (see Fig. 4C).

Art Unit: 3742

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shen, Hsu, and Dong et al are cited to show fin assemblies with latching parts..

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Teresa J. Walberg whose telephone number is 703-308-1327. The examiner can normally be reached on M-F 9:00 - 5:30.
